

Don "Climate" Owens

Educator - Innovator - Leader

Chairman of HNO International
and
Founder of C

Long term exposure to climate change, specifically black carbon, is currently resulting in devastating effects, but Don "Climate" Owens' work in hydrogen technology can help save our world in the next five years.

Over a decade ago, Don was inspired by an article about how hydrogen can improve fuel economy. In an attempt to increase own car's fuel economy, Don created his first hydrogen fuel prototype, on an old truck, in his garage. Since then, Don has developed 19 registered patents that focus on reimagining hydrogen energy.

Today, Don is the founder, and Chairman of the Board, of a growing hydrogen fuel company, HNO International. He is a published author, and has contributed to over 100 podcasts and publications, including Forbes and Entrepreneur magazine. Don's book *Burn Fuel better*, takes the

Today, Owens spreads a message of hope, and impactful solutions, to audiences who are ready to tackle the devastating impact of climate change.

Through keynote speaking, writing, and podcasting, Don strives to spark conversations that disrupt current understandings of the fossil fuel industry, offers hope, and provides solutions for an attainable clean future.
